

GOOGLE-FONTS

1. Choose Fonts:

Visit the [Google Fonts website](<https://fonts.google.com/>) and choose the fonts you want to use on your website. You can filter and select fonts based on various criteria.

2. Select Styles:

Choose the font styles (regular, bold, italic, etc.) you need for each selected font.

3. Add Fonts to your Collection:

After selecting your desired fonts and styles, click on the "Family Selected" button at the bottom of the page. This will add the fonts to your collection.

4. Embed Fonts:

Click on the "Embed" tab, and you will find the code snippet to include in your HTML file. It typically looks like this:

```
``html

<link rel="preconnect" href="https://fonts.gstatic.com">

<link
href="https://fonts.googleapis.com/css2?family=Font1:wght@300&family=Font2&display=swap" rel="stylesheet">

``
```

Ensure that the `link` tag is placed in the `` section of your HTML file.

5. Apply Styles in CSS:

In your CSS file, you can apply the Google Fonts to specific elements. For example:

```
``css

body {

    font-family: 'Font1', sans-serif;

}

h1 {

    font-family: 'Font2', serif;
```

```
font-weight: 700; /* Specify font weight if needed */  
}  
...
```

Replace 'Font1' and 'Font2' with the actual names of the fonts you selected.

Code format:

HTML:

```
```html  
<!DOCTYPE html>
<html lang="en">
<head>
 <meta charset="UTF-8">
 <meta name="viewport" content="width=device-width,
initial-scale=1.0">
 <title>Your Website Title</title>
 <!-- Add the Google Fonts link here -->
 <link rel="preconnect" href="https://fonts.gstatic.com">
```

```
<link
href="https://fonts.googleapis.com/css2?family=Font1:wght@300&family=Font2&display=swap" rel="stylesheet">
```

```
<!-- Link to your CSS file -->
```

```
<link rel="stylesheet" href="styles.css">
```

```
</head>
```

```
<body>
```

```
<!-- Your HTML content goes here -->
```

```
</body>
```

```
</html>
```

```
...
```

CSS (styles.css):

```
``css
```

```
body {
```

```
 font-family: 'Font1', sans-serif;
```

```
}
```

```
h1 {
```

```
 font-family: 'Font2', serif;
```

font-weight: 700; /\* Specify font weight if needed \*/

}
